Education

Bahrain Polytechnic / Bachelorette in Information technology
Majored in programming

2016 - 2021, Isa Town

As a graduate, most of the studies were focused on practical work with a large number of projects that I had to complete, the projects were varied as I had to make phone apps, web apps, graphical apps and command line applications. I also learned to connect to and design database schemas.

Al Tawoon secondary school / Secondary School
September 2006 - June 2010, Sannad

Bait al talieam / English Language Courses
2008 - 2009, A'ali

—

Skills

Windows & Linux Experience

Computer Programming languages
Flutter / Mobile apps

> I created multiple mobile applications using the flutter framework and a few have been put on the play store. You can find them here https://rb.gy/ikn29

Java / CLI and GUI desktop applications
PHP / Web Apps
C# / CLI, GUI, Games as well as Web apps using ASP.NET

> Using C# I created multiple database connected applications with ASP.NET

Python
Swift / IOS Applications

Databases / MySQL and Microsoft SQLServer

i learned how to perform the basic data manipulation commands, and i have also learned to connect to databases using C# and PHP in order to create rich user experiences

Cloud Services / Amazon Web Services

In my last semester of university I made a graduation project using AWS services. I used services such as Lambda and Rds along with Lightsail to host our PHP website.

Beginner Game Development / Unity engine (C#)

I took a game development course which taught me the basics of game development, and in order to pass the course I made a simple game using the Unity engine with 5 levels

Speaking And Writing Skills / English & Arabic
Intermediate Microsoft Office / Word, Excel and PowerPoint
